*Your Design, Our Engineering*

# Conveyors Series

## Precision-Made for Every Operation

Whatever you need to move, **we build the conveyor that moves it flawlessly**. Our portfolio ranges from ultra-quiet parcel belts to heavy-duty pallet lines, each engineered to your exact length, width, speed, and incline. Choose among gravity or powered rollers (tangential-belt, line-shaft, or smart motor-rollers) and combine them with high-speed belt curves at 30°, 45°, 60°, or 90°—running smoothly at up to **3 m/s**. Integrate StripMerge or roller-merge units for precise lane consolidation, add telescopic belts and roller booms for trailer loading, and finish with pallet elevators or box lifts that bridge every level change. If you can imagine a transport flow, we can translate it into a turnkey conveyor system—ready to plug into your controls and grow with your business.

### Key Advantages:

- ✔ **Unlimited Configurability** – Custom lengths, widths, inclines, and radii ensure the perfect fit for any facility layout.
- ✔ **Multi-Drive Flexibility** – Select tangential-belt, line-shaft, or individual motor-rollers to balance speed, noise, and energy use.
- ✔ **High-Speed Belt Curves** – 30°, 45°, 60°, and 90° curves maintain parcels at up to 3 m/s without product slippage.
- ✔ **Robust Roller Options** – Gravity or powered roller beds handle everything from lightweight cartons to fully loaded pallets.
- ✔ **Precision Merging** – StripMerge and angled roller merges (30°–60°) deliver seamless lane convergence with minimal gap.
- ✔ **Vertical Integration** – Pallet and box elevators preserve flow between mezzanines, docks, and ground level.
- ✔ **Telescopic Reach** – Extendable belts and rollers accelerate vehicle loading/unloading, cutting dock times dramatically.
- ✔ **Plug-and-Play Modularity** – Pre-wired modules and quick-connect frames reduce installation and future reconfiguration costs.
- ✔ **Durability** – Heavy-gauge frames, low-friction bearings, and condition-based maintenance keep lifetime costs down.

From e-commerce fulfilment to palletized distribution—and every application in between—our conveyors deliver the versatility, reliability, and performance that modern logistics demand.

*Elevate your logistics with next-gen conveyor solutions —  
where seamless flow meets unrivaled versatility.*
